Re: College Works Panting

Dear future clients,

I was thoroughly impressed by the amount of professionalism carried by the College Works Painting team and their supervisor. From the minute they stepped into my house until the last of the painting was done, I enjoyed having them around!

I was especially impressed by the extent of preparation that went into my house. They washed the entire thing off with a power washer and used a chemical to get my gutters and garage door cleaned off properly. After that, they took their time to make sure that everything was sanded smooth and all the cracks on my eaves were filled in with caulking.

The crew and manager were the best part though! My yard was constantly spot-less and free of equipment lying around and my landscaping was taken care of extremely well. I was able to see each night what was done the previous day and also what was planned for the next. My house had several rotting boards, which were replaced and painted.

My house looks great. Before they were here, it was faded and deteriorating. They transformed it into what looks like a brand new home. Several of my neighbors have commented on it already, and College Works is currently painting my next-door neighbors house right now!

For the price I paid, I could not have asked for anything more. I would recommend CWP to anyone looking for a quality paint job and a courteous crew. They made the whole process very enjoyable and I received both excellent customer service and quality work.

Thank you,
