

My experience with College Works Painting:

I strongly believe that my internship with College Works Painting is one of the best steps I have taken in my life. The things I learned in this program are invaluable and will be used throughout the rest of my business career. I now know for sure that I want to be an entrepreneur. College Works is a great experience to get in to as long as you can make the time commitment. I cannot think of any job I could have had this summer that would have been more valuable.

Arieh Katz, my District Manager, was such a huge help in the success of my \$101,000 business. Without Arieh, I would be nowhere. Arieh was there every step of the way, always open for support or advice. I recommend the College Works experience to any student looking to change their life and learn great business skills. Thank you for the opportunity.
